

Technical Artist and team lead with a strong Unity background and experience shipping and supporting live mobile games. I build tools, solve production and performance problems, and work closely with art and development teams while staying hands-on in Unity.

EXPERIENCE

Technical Artist Team Lead · Beach Bum Jun 2026 – Present

Backgammon: Lord of the Board

- Lead technical art for Backgammon: Lord of the Board as part of the core development team.
- Manage the tech art team, priorities, and day-to-day work.
- Work closely with art, product, and monetization to turn their ideas into working features and content in Unity.

Technical Artist Team Lead · PlayPerfect Jan – Jun 2026

Solitaire Smash · Bingo Billions

- First Technical Art Lead at the company. Set up the team's processes, workflows, and optimization standards.
- Managed five technical artists across two live games, covering both feature development with the dev team and high-volume live content and monetization production.
- Built internal Unity tools to automate repetitive production work.

Technical Artist Team Lead · Beach Bum 2024 – Jan 2026

OPA! · HexaCoin · WildRun

- Led technical art across three mobile titles in different genres; managed and mentored four technical artists.
- Built a shared Unity platform powering multiple games with common systems, features, and content.
- Developed and maintained an in-house content creation tool used across teams and studios.
- Mentored technical artists across the company and ran internal workshops.

Technical Artist · Beach Bum 2022 – 2024

Spades Royale

- Integrated and optimized 2D/3D assets, shaders, and VFX in Unity on live games and early-stage titles.
- Profiled and optimized graphics performance — draw calls, batching, memory.

Game Product Lead · Road2 2021 – 2022

- Founded and led a small team building a 2D PC indie game, and pitched it to publishers and investors.
- Worked on technical art, game design, and level design.

SKILLS

Unity

2D, 3D, UI, URP, editor tools, asset bundles

Technical Art

Shaders (HLSL, Shader Graph), VFX & particles, animation, 2D rigging

Performance

Profiling and optimization: draw calls, batching, memory

Pipeline

Production workflows, 2D/3D tool integration, Unreal Engine 4

Code

C#, C++, HLSL

Software

Maya, Adobe Suite, Git

EDUCATION

Tiltan School of Design

B.Sc. Game Design & Development

2019 – 2022
